

FABRI-TEC

Silicone/Fluorochemical Repellant

Fabri Tec is a special fabric treatment that provides both water and oil repellency. It combines the benefits of silicone and fluorocarbon resin systems. The curable silicone resin system provides durability, improved water repellency and better fabric hand. The fluorocarbon resin provides excellent oil repellency. The unique combination of ingredients in this formula will provide treated fabric with more durable protection. The use of Fabri-Tec will result in furniture with a more pleasant and less harsh feel at lower cost than conventional treatments.

- **Synergistic Blend** - Provides the benefits of both silicone and fluorocarbon resin systems leaving fabric with a soft, full hand. Eliminates problems associated with treating synthetic fabrics.
- **Waterless** - Solvent formula contains no water and is safe to use on most fine upholstery, draperies, tapes-tries and fabrics that might normally have dye bleed or browning problems.
- **Solvent Action** - The special solvent-base formula effectively wicks, creeps and penetrates for better coverage this results in upholstery that's thoroughly and more effectively protected.
- **Easy-To-Use** - Simply spray using a pressure type sprayer at 5 to 10 psi. This product cures to deliver full protection within 24 - 48 hours (when room is kept at normal temperatures between 65-80 degrees F).
- **Versatile** - Used to treat automotive and domestic upholstery, constructed with nylon, polyester, polyolefin, acrylic, and wool substrates. Works well on both high and low nap fabrics.
- **Convenient Packaging** - Available in cases of 12 quarts, 4 gallons and 5 gallon pails.

Technical Data

Appearance	Clear, colorless, water thin liquid
Odor	Slight hydrocarbon
pH Concentrate	Not applicable
Solubility	Soluble in mineral spirits
Rinsability	Rinses film free
Flash Point (TCC)	120°-130°F
Cure Time (Initial)	4-5 hours
Cure Time (Max. Protection)	24-48 hours
Specific Gravity	0.767
Viscosity	<10
Shelf Life	Guaranteed one year
