

**old time**

The beauty of wood is enjoyed by millions of home owners. They find pleasure in the warmth and tradition of wood floors, paneling, cabinets and furniture.

Wood is quickly becoming the flooring choice for homes and businesses. Wood is chosen because of beauty, strength and durability. Kleenco's Old Time products add an additional reason to choose wood . . . ease of maintenance.

The Old Time product line sets the standard for quality products designed to clean, protect and preserve all of your wood surfaces. Use Old Time products to help your wood floors, paneling, cabinets and furniture last a lifetime.

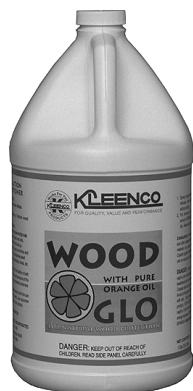

***We Make Cleaning Easy!***

## **Oil Soap Pure Vegetable Oil Soap**

A natural formula for the safe cleaning of finished wood surfaces. Use it to clean cabinets, doors and paneling without stripping the natural protective oils. Contains no harsh detergents or strong alkalies. Protects the beauty of all natural wood surfaces. Not for use in cleaning wood floors. Use Old Time Wood Wash for floors.

## **Wood Glo Orange Oil Treatment**

Natural citrus oil formula designed to feed essential oil deep into the wood grain. Restores tired wood to a beautiful sheen and polish. Use it to clean, polish and protect wood paneling, cabinets, doors and other wood work. Not for use on floor surfaces.

## Old Time Wood Floor Wash

pH balanced floor cleaner

The National Oak Flooring Manufacturers Association recommends

weekly vacuuming or damp mopping as the minimum care needed to keep wood floors looking new year after year. They also state *do not use an oil soap* for damp mopping.

Wood Wash is a special cleaning agent formulated for all finished wood floors including Swedish finish floors. Contains selected surfactants for the controlled removal of damaging spills and general cleanup of dust, dirt, and grime which dull the finish. These are soils left behind by inferior cleaning solutions such as vinegar and water. Do your own side-by-side cleaning test comparing Wood Wash to vinegar and water you'll be impressed with the results.

Formulated with a mild acid (a by product of sugar cane refining). Wood Wash has the ideal pH to prevent the darkening of wood floors when used on a regular basis.

## Old Time Wood Floor Finish

Solvent Based Acrylic Wood Floor Finish

Most wood floors are protected with a surface

finish of Polyurethane, "Swedish finish", or Moisture Cured Urethane. Although these finishes are hard and durable they are prone to wear. The National Oak Flooring Manufacturers Association recommends protecting the finish with a solvent base coating.

Wood Floor Finish is a solvent base acrylic finish that forms a lustrous protective coating that prevents dirt from penetrating the finish and helps to prevent scratches. It is easily repaired by buffing with our solvent reconditioner Old Time Wood Floor Prepare.

**Distributed By:**

## Old Time Wood Floor Prepare

Solvent Conditioner

Even the toughest polyurethane finish occasionally needs

restoration or deep cleaning.

Old Time Wood Floor Prepare is a solvent base, non-residue cleaner especially designed for deep cleaning wood floors coated with polyurethane finishes. It will remove black marks, rubber burns and stains.

Wax buildup on floors can inhibit the bonding of finish to the floor. Wood Floor Prepare is excellent for removal of wax buildup before refinishing. Easy to apply it works fast and increases the adhesion of finishes and wax.

This water-free formula is designed for use on all wood surfaces and finishes. ?Questions . . . Visit our ask the expert page on the web at [www.kleenco.com](http://www.kleenco.com).
